Research Report: Sponges

This report presents detailed findings on the role of sponges in aquatic ecosystems. The research focuses on sponge biodiversity, their ecological functions, and contributions to marine health.

Object Detection Results

The chart below shows the frequency of detected objects in analyzed images:

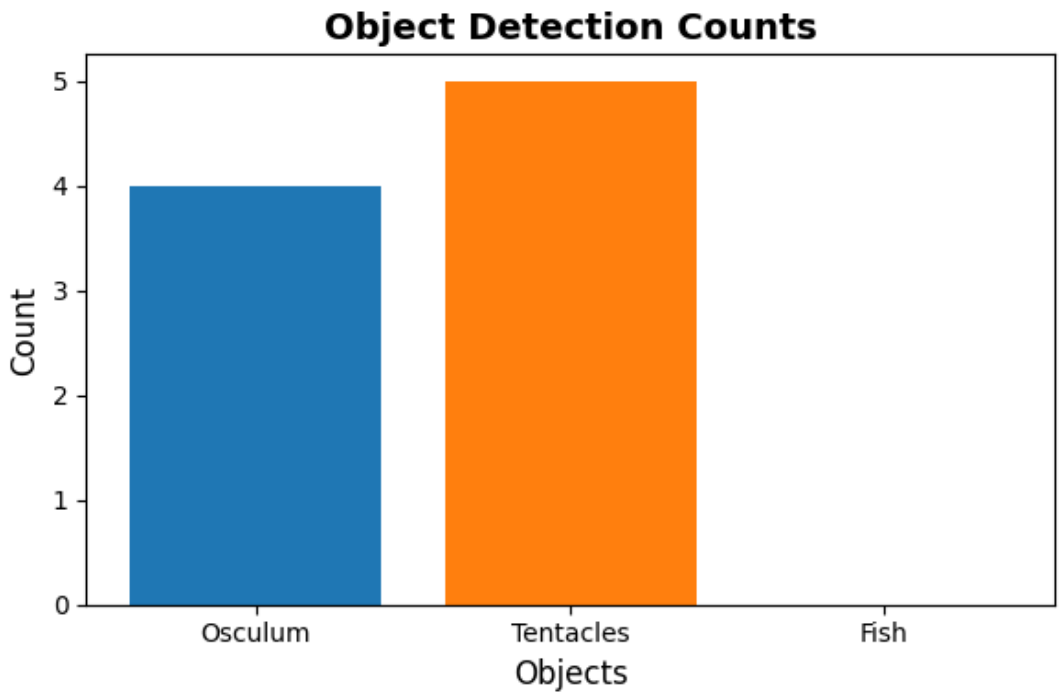

Image Analysis

The following table contains sample images analyzed during the study:

Label	Image
Denoised Image	
Deconvolved Image	

Label	Image
	
Bilateral Filtered Image	
Inpainted Image	
Gaussian Filtered Image	
Sobel Filtered Image	
Wavelet Denoised Image	

Label	Image
	
Threshold Image
